If a combined return is filed, one of the corporations in the combined group, usually the common parent (if eligible for inclusion), must be designated as the Reporting Corporation. Each corporation included in a combined return must file its own separate return (Form 83-105 and accompanying schedules) showing the computation of its Mississippi Taxable Income and Income Tax Credits (Form 83-401). Each eligible corporation's Mississippi Taxable Income or Loss is then included on this schedule (Form 83-310) and the income tax for the combined group is paid by the designated Reporting Corporation. The other members of a combined group do not remit any income tax on their separate return but, must check "yes" on Line 3, Form 83-105 and complete Line 4, Form 83-105 listing the reporting Corporation. See the instructions for additional explanation.

Reporting Corporation reports the totals of Columns B and C on Form 83-105, Page 1, Lines 6 and 4 respectively. Other included corporations on Line(s) 2 below, report "zero" on Line 4, Page 1, Form 83-105. Reporting Corporation must attach this form (Form 83-310) to its Mississippi Income Tax Return.

The different credits must be totaled separately. The credit of one corporation cannot offset tax due from another corporation. The limits should be computed separately on Form 83-401 with only the allowable portion included on this schedule.

computed separately on Form 83-401 with only the	allowable portion included on tr	is schedule.
